

A complex, futuristic graphic on the left side of the image. It features a central black circle surrounded by concentric rings of glowing blue light. The rings are composed of various geometric shapes, including squares and circles, creating a sense of depth and motion. The overall effect is reminiscent of a high-tech interface or a digital eye.

# Introducing NITMeds, the plan for the medical services webapp for NIT Rourkela

*By -*  
*Prapti Prachita Pradhan*  
*Pravendra Anuragi*  
*Varun Arora*  
*Sachin Mishra*

## *Q. What is NITMeds?*

NITMeds is a webapp that will help the students of NIT Rourkela get easy access to medical services, and get their medical leaves approved without repeated visits to the dispensary.

# *Q. What is the idea?*

Applying for sick leave requires a lot of work. It requires students to travel to the dispensary, to get their sick leaves approved and sign their papers by the FacAd.

With NITMeds, it can be done from the comfort of the student's room.

Additionally, it provides information to the students about the availability of doctors and medicines in the dispensary and their past medical records.

# ***Q. How does it work?***

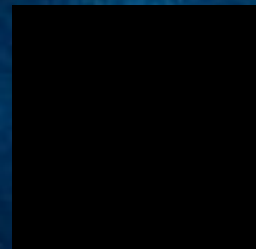

**Login to NITMeds using  
NITR Roll Number and  
Zimbra Password**

**Features**

**Acknowledgment via  
Emails**

**Result**

**The contact option contains the contact numbers  
of -**

1. Doctors
2. Caretakers of all hostels
3. Auto drivers inside the campus
4. Ambulance

# ***Q. How to apply for Sick Leave?***

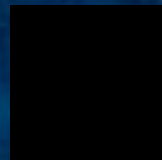

**Upload required  
prescription form**

**Verification  
process**

**Wait for the  
approval by FacAd**

**Fill out the online  
application for  
sick leave**

# ***Q. How the website is going to check that the prescription uploaded by the student is genuine or not?***

- When the doctor will prescribe medicines to the student for the first time , a record of the prescription will be uploaded in the webapp.
- The student can only access the permission to online sick leave when the student uploads the prescription assigned to him/her by the doctor.
- The webapp will check the records which prevents the use of unfair means.

## ***Q. What is the advantage of our webapp?***

- To get sick leave, students have to visit the dispensary while sick, which doesn't exactly aid in their process of getting better.
- Also, the dispensary is far off from a majority of the hostels, making it to get sick leave a rather tedious job.
- With the help, all of this can be made easier for both the students as well as the administration.

***THANK  
YOU!***
